1. NATURE OF OPERATIONS AND GOING CONCERN

Uracan Resources Ltd. (“Uracan” or “Company”) was originally incorporated as 583860 B.C. Ltd. in the province of British Columbia on April 21, 1999. The Company changed its name to Uracan Resources Ltd. on July 27, 2006. The Company is publicly listed on the TSX Venture Exchange under the symbol URC and its registered and records office is located at 2500 – 700 W. Georgia Street, Vancouver BC, V7Y 1B3. The Company operates in one reportable segment, being the acquisition and exploration of uranium properties. All of the Company’s assets are located in Canada. The Company has not generated revenues from operations and is considered to be in the exploration stage.

While these unaudited condensed interim financial statements have been prepared on a going concern basis, which assumes that the Company will continue its operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business, there are conditions that cast significant doubt on the validity of this assumption. As at January 31, 2017, the Company had a working capital deficit of $168,481. The Company recorded a loss of $2,151,455 during the six months ended January 31, 2017, and had an accumulated deficit of $45,958,162 as at January 31, 2017. The Company’s ability to continue as a going concern is dependent on management’s capacity to identify additional sources of capital and to raise sufficient resources in order to fund on-going operating expenditures and the Company’s development plan. Although management has been successful in the past, there is no assurance these initiatives will be successful in the future. These unaudited condensed interim financial statements do not include adjustments that would be necessary should the Company be unable to continue as a going concern. These conditions may cast significant doubt as to the Company’s ability to continue as a going concern.

2. BASIS OF PRESENTATION

(a) Statement of compliance

The Company prepares its annual financial statements in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board. These unaudited condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting and follow the same accounting policies and methods of application as the Company’s most recent annual financial statements. Accordingly, they should be read in conjunction with the Company’s most recent annual financial statements. These unaudited condensed interim financial statements were approved by the board of directors on March 29, 2017.

(b) Recent accounting standards not yet effective

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC. The following have not yet been adopted by the Company and are being evaluated to determine their impact.

- IFRS 9: New standard that replaced IAS 39 for classification and measurement, effective for annual periods beginning on or after January 1, 2018.

- IFRS 16 – Leases: New standard to establish principles for recognition, measurement, presentation and disclosure of leases with an impact on lessee accounting, effective for annual periods beginning on or after January 1, 2019.

3. EXPLORATION AND EVALUATION ASSETS

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its exploration and evaluation assets, and, to the best of its knowledge, title to all of its properties, are properly registered and in good standing.

The following table summarizes the capitalized costs associated with the Company's exploration and evaluation assets:

3. EXPLORATION AND EVALUATION ASSETS (continued)

Saskatchewan Properties

a) Clearwater Project

In August 2014, Uracan signed a definitive option agreement (the “Forum Agreement”) with Forum Uranium Corp. (“Forum”), whereby Uracan can earn up to a 70% interest in Forum’s Clearwater Project (the “Clearwater Project”) in northern Saskatchewan.

Currently Uracan has earned a 25% interest in the Clearwater Project, with Forum holding the remaining 75% interest. Uracan earned the 25% interest with the cumulative exploration expenditures of $1.5 million. In order for Uracan to earn a 51% interest, the Company must spend an additional $1.5 million in exploration by August 29, 2017, and can elect to earn up to a 70% interest by funding cumulative expenditures of $6.0 million by August 29, 2019.

Pursuant to the Forum Agreement, the Company issued a total of 300,000 common shares to Forum. Uracan will also grant Forum a 2% net smelter royalty (“NSR”) on the property, with Uracan having the option to purchase 1% of the NSR for $1.0 million. Uracan will fund all exploration work until the 51% earn-in option has been completed, after which further work will be funded by both Uracan and Forum under a joint venture agreement. Forum will be the Project operator until Uracan earns its 51% interest, after which Uracan may elect to become the operator.

b) Black Lake Project

In January, 2013, the Company entered into an agreement (the “Agreement”) with UEX Corporation (“UEX”) whereby the Company could earn into the Black Lake Project (the “Project”) in the Athabasca Basin in northern Saskatchewan. The Project is currently a joint venture between UEX (90.92% interest) and AREVA Resources Canada Inc. (“AREVA”) (9.08% interest).

Under the Agreement, as amended on November 25, 2015, Uracan was to fund a total of $10.0 million of project expenditures on or before December 31, 2023, to earn a 60% interest in the Project from UEX, with no partial earn-in permitted including minimum expenditures of $1.0 million per year.

During the six months ended January 31, 2017, the Company was unable to fund its minimum commitment under the Agreement and the option expired. As such, the Company recognized an impairment of $1,670,408 on the statement of loss and comprehensive loss in the period.

c) Pipewrench Lake and Narrows Lake Properties

The Company holds four claim blocks in the Pipewrench Lake and Narrows Lake areas in Saskatchewan. The Company has a 100% interest in these properties.

d) Quebec Properties

On July 27, 2006, the Company signed an option agreement with Sheridan Platinum Group Limited (“Sheridan”) whereby the Company purchased a 100% interest in the Lac Turgeon, Wee Gee, Pontbriand and Costabelle properties (the “North Shore Properties”) located along the Quebec North Shore of the Gulf of St. Lawrence. The Company paid Sheridan $2,000,000 and issued Sheridan 70,000 common shares of the Company.

3. EXPLORATION AND EVALUATION ASSETS (continued)

d) Quebec Properties (continued)

Pursuant to the option agreement, the Company is required to make advance royalty payments of $25,000 per quarter, which commenced January 1, 2008. As at April 30, 2012, the Company had paid Sheridan a total of $450,000. Following the de facto moratorium on uranium exploration in Quebec, in 2013, which remains in effect, the Company considered the agreement to have been frustrated, but due to potential legal uncertainty it continued to accrue the payments and as at July 31, 2015, had accrued a total of $325,000 in advance royalty payments.

During the year ended July 31, 2015, the holder of the advance royalty acknowledged the Company's position that the agreement had been frustrated and accordingly the Company recorded $325,000 as forgiven advance royalties payable in the statement of loss and comprehensive loss.

4. NOTES PAYABLE

During the six months ended January 31, 2017, notes payable of $60,000 were issued to a director of the Company. As at January 31, 2017, notes payable of $105,000 (July 31, 2016: $45,000) were outstanding to this director. The notes accrue interest at 6% per annum and are payable on demand. As at January 31, 2017, accrued interest on notes payable of $18,930 (July 31, 2016: $16,819) was included in trade and other payables in the statement of financial position.

5. EQUITY

(a) Authorized

Unlimited number of common shares with no par value
Unlimited number of preferred shares with no par value

(b) Issued and fully paid common shares

As at January 31, 2017, there were 105,944,601 common shares issued and outstanding.

During the six months ended January 31, 2017, the Company closed the second tranche of a non-brokered private placement, consisting of 3,600,000 flow-through shares at a price of $0.05 per share for gross proceeds of $180,000, and 704,000 non flow-through units at a price of $0.05 per unit for gross proceeds of $35,200. Each non flow-through unit consists of one common share and one half of a warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of $0.10 per common share until August 2, 2017. The warrants issued in connection with the non-brokered private placement were allocated a fair value of $1,049 on a relative fair value basis. Cash share issue costs of $16,270 were incurred, of which $16,191 and $79 were deducted from share capital and reserves respectively, based on the pro rata allocation of the fair value on issuance of the units to share capital and reserves. A flow-through share premium liability of $18,000 was allocated to the flow-through portion of this non-brokered private placement.

During the six months ended January 31, 2017, the Company closed a non-brokered private placement, consisting of 1,538,461 flow-through shares at a price of $0.065 per share for gross proceeds of $100,000. Cash share issue costs of $9,850 were incurred. A flow-through share premium liability of $23,077 was allocated to these flow-through funds.

(Expressed in Canadian dollars)

5. EQUITY (continued)

(b) Issued and fully paid common shares (continued)

During the year ended July 31, 2016, the Company closed the first tranche of a non-brokered private placement, consisting of 16,000,000 flow-through shares at a price of $0.05 per share for gross proceeds of $800,000, and 12,127,500 non flow-through units at a price of $0.05 per unit for gross proceeds of $606,375. Each non flow-through unit consists of one common share and one half of a warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of $0.10 per common share until June 30, 2017. The warrants issued in connection with the non-brokered private placement were allocated a fair value of $59,978 on a relative fair value basis. Cash share issue costs of $66,651 were incurred in connection to the non-brokered private placement, of which $64,016 and $2,635 were deducted from share capital and reserves respectively, based on the pro rata allocation of the fair value on issuance of the units to share capital and reserves. A flow-through premium liability of $80,000 was allocated to the flow-through portion of the non-brokered private placement.

(c) Share options

The Company has established a rolling Share Option Plan (the “Plan”). Under the Plan, the number of shares reserved for issuance may not exceed 10% of the total number of issued and outstanding shares and, to any one optionee, may not exceed 5% of the issued shares on a yearly basis. The maximum term of each option shall not be greater than 10 years. The exercise price of each option shall not be less than the market price of the Company’s shares at the date of grant. Options granted to Consultants performing Investor Relations Activities shall vest over a minimum of 12 months with no more than 1/4 of such Options vesting in any 3 month period. All other options vest at the discretion of the Board of Directors.

A summary of the changes in share options is presented below:

	Outstanding		Weighted average exercise price

7. FINANCIAL INSTRUMENTS

Financial Risk Management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's financial instruments consist of cash, amounts receivable, trade and other payables and notes payable.

The Company classifies the fair value of financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 – quoted prices in active markets for identical assets or liabilities.
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e.: as prices) or indirectly (i.e.: derived from prices).
- Level 3 – inputs for the asset or liability that are not based on observable market data.

Cash, amounts receivable, trade and other payables and notes payable are held at amortized cost which approximates fair value due to the short-term nature of these instruments.

Financial Instrument Risk Exposure

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes.

7. FINANCIAL INSTRUMENTS (continued)

***Financial Instrument Risk Exposure** (continued)*

Credit Risk

Credit risk arises from the potential for non-performance by counterparties of contractual financial obligations. The Company is exposed to credit risk on cash and amounts receivable. The Company reduces its credit risk on cash by maintaining its bank account with a large international financial institution. The maximum exposure to credit risk is equal to the carrying value of its cash and amounts receivable.

Liquidity Risk

At January 31, 2017, the Company had cash of $75,303 to settle current liabilities of $258,848 and had a working capital deficit of $168,481. Refer to Note 1 for additional details of liquidity risk as it relates to the Company continuing as a going concern.

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

Interest Rate Risk

The Company's notes payable bear interest at fixed rates and the Company's bank account earns interest at variable rates. The fair value of its financial instruments is relatively unaffected by changes in short-term interest rates.

Commodity Price Risk

Although the Company is an exploration stage company, it is subject to price risk from fluctuations in market prices of natural resource commodities since its future profitability is dependent on the market price of these commodities. The prices of commodities are affected by numerous factors beyond the Company's control. Fluctuations in commodity prices could result in future commercial production that is impracticable to the Company. Therefore, management regularly monitors natural resource commodity prices to determine the appropriate course of action to be taken by the Company.

Equity Price Risk

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Currency Risk

The Company is not exposed to currency risk as all transactions are denominated in Canadian dollars.

8. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its uranium properties, acquire additional mineral property interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt or acquire or dispose of assets. Refer to Note 1 for additional details of the Company's ability to continue as a going concern. The Company is not subject to externally imposed capital requirements.

9. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Significant non-cash investing or financing transactions included:

- A flow-through share premium of $41,077 (July 31, 2016: $80,000) was recorded as a reduction in share capital.
- Included in trade and other payables at January 31, 2017, is $6,438 (July 31, 2016: $22,878) of exploration and evaluation costs.
